Projects

AI System Monitor

- Developed an **AI-powered** infrastructure monitoring and **anomaly detection** tool
- It monitors network traffic, detects suspicious or malicious activity using AI, and helps identify and block potential network attacks in real time
- **Tech Stack : Python, Elasticsearch, Logstash, Kibana, Docker**

Smart Expense Management System

- Built a **full-stack** expense management application that allows users to record, categorize, and analyze their expenses through an **interactive dashboard**
- Implemented **REST APIs**, **user authentication**, **SQL database** integration, and automated spending summaries to provide a practical personal-finance management solution
- **Tech Stack : Java/Spring Boot, MySQL, React, REST APIs, JWT**

KrishiSetu

- Developed a multilingual AgriTech marketplace platform connecting rural farmers directly with buyers through web, mobile, and kiosk systems.
- It uses integrated **AI-based price prediction**, **voice-enabled support**, and **secure digital payments** to promote fair trade, digital inclusion, and rural financial empowerment across underserved communities
- **Tech Stack: MongoDB, JSON Web Tokens, bcryptjs**
